18 December 2013

INCA MINERALS LIMITED SHARE PURCHASE PLAN CLOSES

Inca Minerals Limited [ASX: ICG] (**Inca** or **Company**) is pleased to announce the Company's Share Purchase Plan has closed having raised A\$513,000.

Funds raised from the SPP are an important addition to the Company's existing treasury and will be used to progress Inca's future exploration activities at Chanape, its flagship project in Peru, and for general working capital.

Inca's Managing Director, Mr Ross Brown said "To date the Company has drilled two deep holes and has a 100% success rate with both holes having intersected porphyry. The SPP was an opportunity for our entire share register to support the Company's future exploration activities and, with the vast majority of the current drilling campaign still to complete, we expect considerable news flow and positive results over the coming months. The Inca Board look forward to our shareholders being rewarded for their support."

The Company expects allotment of SPP Shares to occur on or before 20 December 2013 (as per the indicative timetable for the SPP).
